Art Unit: 1792
Examiner: G. Ragesh Rao
Date: April 23, 2009

For: SYSTEM FOR CONTINUOUS
GROWING OF MONOCRYSTALLINE
SILICON

AMENDMENT

Assistant Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

In response to the Official Action mailed November 25, 2008, please amend the application as follows.

desired level without vertical travel of the crucible; and separately controllable heater elements are provided adjacent the crucible for transferring a desired amount of thermal energy to the adjacent portion of the crucible for providing a controllable thermal distribution across the crucible and at the crystal / melt interface. When, as here, the references fail to suggest the foregoing structure, claim 19 is believed to patentably distinguish over the cited combination. Reconsideration and allowance of claim 19 are respectfully requested.

In view of the above amendments and remarks, it is believed that this application is now in condition for allowance and such a notice is respectfully requested.

Respectfully submitted,

By: Michael Hetherington
